PROFESSIONAL SUMMARY

Passionate Computer Vision Engineer with research experience in CNN architectures and real-time video analytics. Background building surveillance and quality inspection systems for Indian industrial clients.

TECHNICAL SKILLS

Core ML Skills: Machine Learning, Supervised Learning, Statistics, Deep Learning, Unsupervised Learning

ML Libraries & Frameworks: Pandas, XGBoost, LightGBM, Keras

Deep Learning & Neural Networks: CNN, Transfer Learning, LSTM

Data Engineering: ETL, NoSQL

Data Visualization: Tableau, Seaborn, Matplotlib

Soft Skills: Problem Solving, Leadership, Communication, Attention to Detail, Critical Thinking, Time Management

PROJECTS

Predictive Churn Model for Telecom

Tech Stack: Pandas, Tableau

- Engineered 45+ features from raw telecom usage data including RFM and behaviour signals.
- Compared XGBoost, LightGBM, and Random Forest; selected LightGBM at 88% AUC-ROC.
- Tracked 30+ experiments using MLflow and registered best model to the model registry.

Medical Image Classification using CNN

Tech Stack: CNN, Deep Learning

- Built a ResNet-50 transfer learning model for pneumonia detection from chest X-rays.
- Trained on NIH dataset (10K images), achieving 94% accuracy and 0.92 AUC.
- Implemented Grad-CAM heatmaps for model interpretability and clinical validation.

Sentiment Analysis Engine for E-commerce Reviews

Tech Stack: Pandas

- Fine-tuned a BERT-based model on 200K e-commerce reviews achieving 91% F1 score.
- Built an ETL pipeline to ingest reviews daily from multiple platforms using Airflow.
- Deployed the model as a REST API serving 5,000+ inference requests per day.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

College | 2026 | CGPA: 9.16

Class XII – Board

2022 | 91.3%

Class X – School

2020 | 100.0%
